## SUMMARY

Detail-oriented Full Stack Developer with experience in back-end development, proficient in PHP and Python. Strong understanding of server-side architecture and design patterns, with a focus on API development and database management. Committed to writing clean, maintainable code and collaborating effectively within cross-functional teams.

## SKILLS

**Hard Skills:** PHP, Python, HTML/CSS, Javascript, Dart, Laravel, FastApi, VueJs, Flutter, MySQL, MongoDB, ChromaDB, Git & GitHub, BitBucket, Docker, CI/CD, AWS, Digital Ocean

**Soft Skills:** Passionate, Organized, Teamwork, Communication, Problem Solving, Adaptability, Prompt Engineering

## WORK EXPERIENCE

### GMBF IT Solutions

Nov 2023 - Present

Full-Stack Software Developer

Hybrid

- Managed full-stack development for internal system management web apps, ensuring high availability and performance.
- Designed and implemented scalable RESTful APIs with PHP/Laravel, serving mobile and MiniApp functionalities.
- Developed and deployed multiple KBZPay MiniApps, enhancing platform functionality and user engagement.
- Engineered cross-platform mobile apps using Flutter, delivering seamless user experiences on iOS and Android.

## PROJECTS

### ShweAI

- Engineered an agentic chat server using FastAPI and WebSockets, delivering real-time AI interactions across web and miniapp platforms.
- Developed a reactive Admin Panel with Laravel and Livewire to manage agent logic and backend operations via a unified PostgreSQL database.
- Built a modern web interface using Vue.js, focusing on high performance and seamless integration with the AI communication layer.
- Orchestrated full-stack deployment for the website, agent server, and backend, ensuring synchronized environment stability and scalability.

### ShweMandalar

- Designed, developed, and deployed robust RESTful APIs to DigitalOcean droplet, ensuring scalable and secure backend support for mobile applications.
- Developed Customer/Reseller and Ticketing Mobile Applications using Flutter, enhancing user accessibility and streamlining ticketing processes.
- Implemented CI/CD pipelines using Bitbucket Pipelines for continuous deployment, significantly improving delivery efficiency and release reliability.
- Configured Docker environments for streamlined local development, accelerating developer project setup time.

### Kawaii JLPT Master (Independent Product)

- Created and launched a TALL Stack (Tailwind CSS, Alpine.js, Laravel, Livewire) web application, providing interactive JLPT exam practice for students.
- Designed and optimized MongoDB database schemas for efficient storage and retrieval of practice exams and user progress data.
- Automated exam data ingestion by developing and deploying a function that web scrape and extract pdf on serverless AWS Lambda, significantly reducing manual data entry and improving efficiency.
- Established Docker containers to ensure consistent and rapid local development environments across the team.

## EDUCATION

Google IT Support Program

Nov 2023 - Sep 2023
